

Garfield Simulation with Single Wall

Irakli Chakaberia
21 October 2015

Description

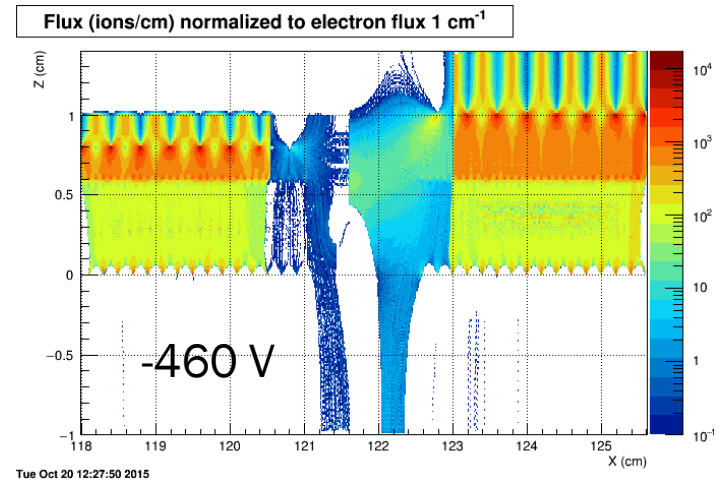

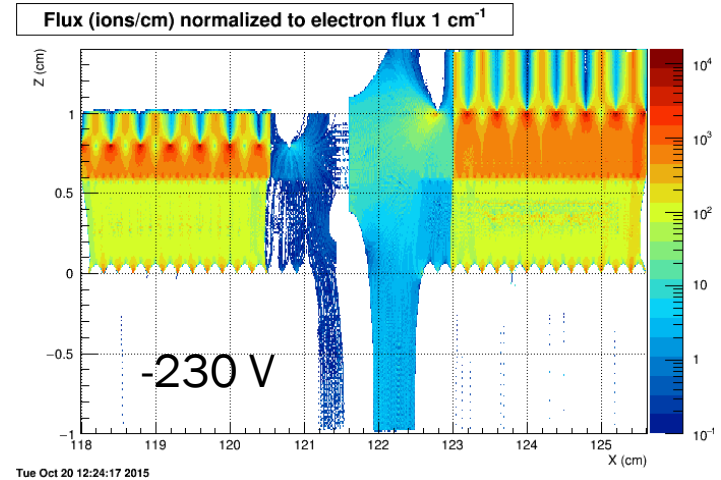

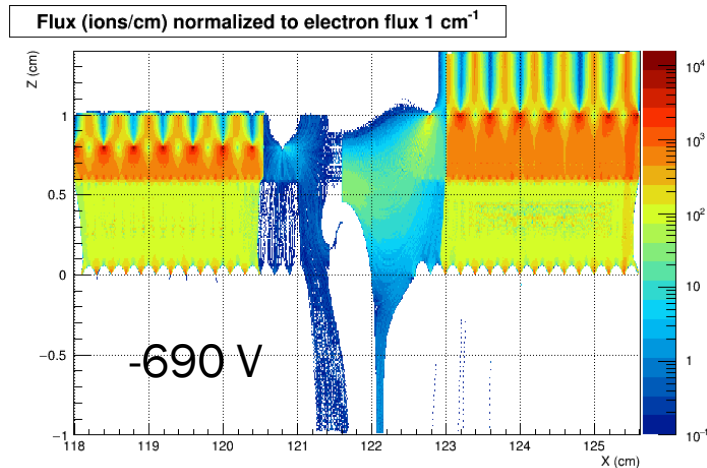

Simulation is for the following scenario

Ion Flux

- Ion Flux with three different potentials on the outer facing side of the wall:

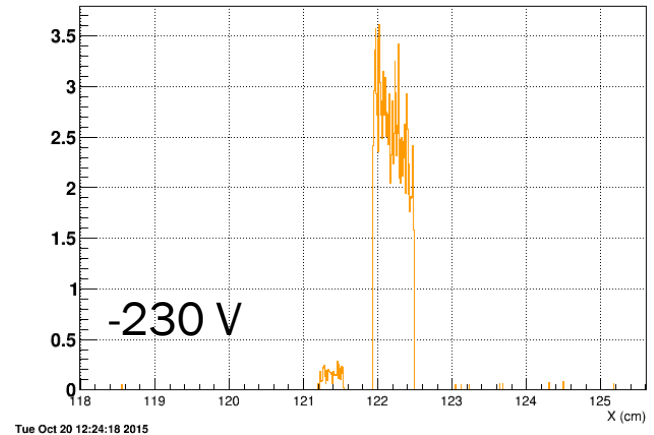

-230V, -460V and -690V

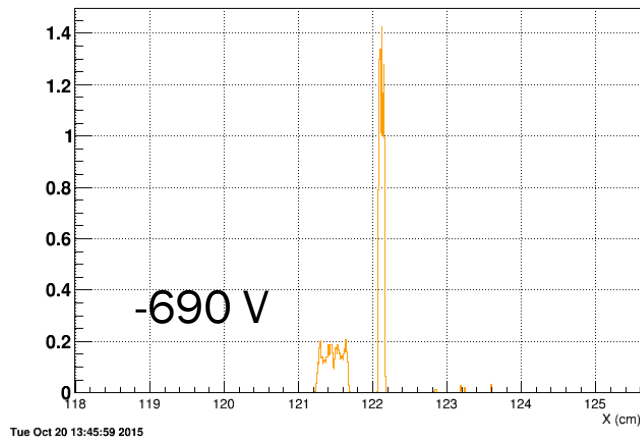

Projection of the Ion Flux

Projection of the Flux

Flux (ion/cm) at -0.25 cm from GG

Flux (ion/cm) at -0.25 cm from GG

Flux (ion/cm) at -0.25 cm from GG
